SUGGESTED USE:

To support calcium deficiencies

• Multi component preparation to support ketosis

- supplements energy deficits at the beginning of lactation
- limits the level of ketone bodies in the blood
- supports liver regeneration process
- improves natural immunity

KETOFIX® 3 kinds of glucogenic substances: glycerin, propylene glycol and sodium propionate, therefore it ensures fast and long-acting increase of glucose level in the blood. KETOFIX® activates energy metabolism and reduces the burning of stored fat. The product stimulates the immune system due to content of selenium and vitamin E, it also helps in fast return to high yield after ketosis.

DOSAGE:

Cows : 300gr-500gr /animal 2 weeks before and up to 6 weeks after parturition.

Sheep/Goats: 100gr-150gr /animal 2 weeks before and up to 6 weeks after parturition.
