

MICROCHIP & READER

Every pet should have its personal pet ID. A small radio frequency identification electronic chip, enclosed in glass cylinder, the size of a rice grain. Microchip doesn't have any internal energy source, simply transmits radio frequency to scanner.

Microchips are inserted under pet's skin quite easy, as any vaccination. Keep track of your pet through your pet, by registering it.

RAPID TESTS

Never before wasn't easier to examine your pet against major diseases. Rapid test for Parvo, Distemper, Ehrlichia, Leishmania, Dirofilarial, combo test, feline. Testing time is close to 15 minutes.

KETONE/GLUCOSE READER

Ketone/Glucose reader for dogs and cats to be checked. Easy to use, fast and reliable results.
