

# MERRICID L

Acidifier BLEND OF MINERAL AND ORGANIC ACIDS with a  
decontaminating effect

## CHARACTERISTICS

- Decontaminating effect thanks to bacteriostatic and bactericide action on pathogenic germs.
- Decrease of the feed and water buffer power.
- Stimulation of enzymatic activity and of protein digestion.
- Control of the intestinal flora balance.
- Better nutrients absorption

## COMPOSITION:

Formic acid	505 875 mg
Sodium formate	64 200 mg
Phosphoric acid	94 000 mg
Propionic acid	50 000 mg
Lactic acid	50 000 mg
Copper (sulphate)	2 000 mg

## SUGGESTED USE

- ✓ Improve digestive security.
- ✓ Improve droppings and beddings quality.
- ✓ Decrease ammonia production.
- ✓ Decrease Consumption Index and improve growth.
- ✓ Improve egg shell quality and animals' longevity in layers breeding.

## DOSAGE:

Non-stop incorporation in drinking water at the rate of:

500 to 1 500ml for 1000 liters of drinking water.

(Depending on the chemical nature of water and risk factors in the breeding).

## RECOMENDATIONS

Never give pure acidifying product.

Pay attention on the initial pH of drinking water.

pH of the water should be controlled regularly to obtain a pH between 4.5 and 5.5.
